PROFESSIONAL SUMMARY

Data Scientist with hands-on experience in Python, SQL, Machine Learning, and Deep Learning, specializing in building end-to-end predictive models. Developed and optimized ML pipelines, improving prediction accuracy from 88% to 93% through hyperparameter tuning. Skilled in data preprocessing, feature engineering, and extracting actionable insights from complex datasets.

TECHNICAL SKILLS

- **Programming Languages & Databases:** Python, SQL, MySQL
- **Libraries & Tools:** Pandas, NumPy, SciPy, Scikit-learn, TensorFlow, Keras
- **Data Analysis:** Exploratory Data Analysis (EDA), Data Cleaning, Data Preprocessing, Reporting, Web Scraping, Regular Expressions, Statistical Analysis
- **Visualization:** Power BI, Matplotlib, Seaborn
- **Machine Learning:** Supervised Learning, Unsupervised Learning, Regression, Classification, Feature Engineering, Model Training, Natural Language Processing, Computer Vision
- **Deep Learning:** Artificial Neural Networks (ANN), Convolutional Neural Networks (CNN), Recurrent Neural Networks (RNN, LSTM, GRU), Transformers
- **Generative AI:** LLMs, LangChain, OpenAI API, Google Generative AI API, Prompt Engineering, RAG (Retrieval-Augmented Generation)

PROFESSIONAL EXPERIENCE

Data Science with Generative AI Intern | Innomatics Research Labs | Nov 2025 – Apr 2026

- Architected end-to-end data science pipelines and developed supervised machine learning models, achieving 92% accuracy and ensuring high reliability in model predictions.
- Deployed Large Language Model (LLM)-based chatbot using LangChain, automating 40% of user query responses.

Machine Learning Intern | Slash Mark IT Solutions Pvt. Ltd. | Dec 2024 – Mar 2025

- Implemented regression and classification models to address predictive analytics challenges, resulting in 76% accuracy.
- Performed EDA and feature engineering on 10,000+ records, improving data quality by 25% and boosting model performance.

PROJECT EXPERIENCE

Bike Wale Data Analysis – Web Scraping & Analytics

[Link](#)

- Engineered a web scraping pipeline using BeautifulSoup to collect 340+ bike records from BikeWale.
- Cleaned and structured raw data to compare petrol and electric bike trends.
- Designed Power BI dashboards to visualize pricing patterns and customer preferences.
- **Tech Stack:** Python, Exploratory Data Analysis, NumPy, Pandas, Power BI, Matplotlib, Seaborn.

Credit Risk Prediction – Banking

[Link](#)

- Analyzed a banking dataset of 30,000+ records to predict loan default risk.
- Fine-tuned classification models using hyperparameter optimization, achieving 93% accuracy.
- Identified key financial factors influencing credit approval decisions.
- **Tech Stack:** Python, Pandas, NumPy, Scikit-learn, Matplotlib, Seaborn.

Emotion Detection Using RNN

[Link](#)

- Built an RNN-based model for emotion classification from text data.
- Processed sequential inputs to improve model learning and prediction consistency.
- Achieved 80% accuracy using multiple modeling approaches.
- **Tech Stack:** Python, TensorFlow, Keras, NLP, Pandas, RNN.

Career Advisor Chatbot

[Link](#)

- Constructed a specialized Large Language Model (LLM) chatbot using the Gemini API.
- Integrated session-based Prompt Engineering for reliable context-aware user interactions.
- **Tech Stack:** Python, Google Gemini API, Prompt Engineering, LLMs.

EDUCATION	
B.Tech in Computer Science Engineering (AI)	2021 – 2025
Parul University, Vadodara CGPA: 7.13/10	
Intermediate	2019 – 2021
Narayana Junior College CGPA: 7.83/10	
SSC	2018 – 2019
Vignana Bharathi High School CGPA: 8.80/10	

CERTIFICATIONS

- Data Science | Cisco Networking Academy
- Data Science with Generative AI | Innomatics Research Labs
- Python | Infosys Springboard
- AWS Cloud Practitioner Essentials | Amazon Web Services
- Prompt Engineering | Cognitive Class AI
